

FAST CATAMARAN: SUPPORT VESSEL / UTILITY VESSEL / RESPONSE CUTTER

Built as a Fast Water Jet Catamaran, designed for multiple rolls where a stable, fast, efficient vessel is required. A innovative vessel with Rapid Response capability using next-generation propulsion to extend operational capabilities. She's a fast, blue water vessel capable of providing support services, emergency assistance and disaster relief even in shallow water. It features increased speed and endurance, a stable platform which is essential in helicopter and/or for Puma Aero Marines VTOL heavy lift helicopter drones operating from her deck.

This Catamaran takes advantage of Next-generation Cummins® QSK95-M twin Marine Diesels with 16 cylinder, 3,132kw 4,200 bhp, directly turning twin Thrustmaster DOEN DJ-450 water jet drives, representing latest improvements in waterjet propulsion technology.

PRINCIPAL DIMENSIONS:

Provided in Lengths between: 50 meters (164') to 52 meters (170')
Normal Draft 1.8 meters (5'9") Depending on the hull configuration
Speed: Cruising at 24 knots

Beam: 13.1 meters (43'")
Displacement Light: 198 tons to 212 tons
Top Speed Light +34 knots
